FRONT-END WEB DEVELOPER

Technology trends | Analytical Skills | Responsive Design

A developer, passionate about the latest front-end technologies. A lifelong learner who is creative and likes taking the initiative approach in building responsive pixel-perfect websites and web applications with the use of JavaScript, HTML/CSS, Bootstrap and React.

A foundation degree holder in software development looking for the right opportunity to explore, experience and be willing to face many challenges in an IT company.

EXPERIENCE

www.bh-education.com - *Sittingbourne, Kent*

March 2022 - Present

Web Developer | Independent Freelance Project

Responsible for developing a mobile-friendly and multilingual website.

- Communicating with my client from time to time discussing the layouts of the web pages and showing the results in screenshots.
- Hosting of the website on the server through NETLIFY and GitHub.
- Implemented multimedia features like an image slide show by using the Bootstrap framework.
- Multilingual website for word translation feature where people can choose different languages.
- Mobile-first approach for responsive design and user experience through the use of CSS media queries, flexbox and CSS grid layout.
- Well-presented content across all the devices, thus ensuring there are no cross-browser compatibility issues.

PERSONAL PROJECTS

Email Form - *Chatham, Kent*

January 2023 - Present

Email Form Developer | Project 1

Responsible for developing a contact form using HTML and CSS where the user can send a message.

- Developed a workable contact form where the user could input data and send a message showing a successful page.
- Html form validation to check the user's valid email and that the input field is not empty.

www.miteshgurung.com - *Chatham, Kent*

January 2022 - Present

Web Developer | Personal Portfolio Website: Project 2

Responsible for developing and designing a personal portfolio website which contains a list of projects, a resume and useful links.

- Built from scratch using the Bootstrap framework with many features such as responsive navigation, cards and links to projects.
- Use of CSS media queries, flexbox and grid layout for responsive design.

Interactive Input Form- Chatham, Kent

December 2023 – February 2023

Html Form Developer | Project 3

Designed and developed an interactive Input form where the user could insert data, edit and delete.

- Allows the user to input data and shows the lists of names that the user can also edit.
- Learned to write a function, pass arguments correctly and call a function.
- Use of conditional statements using if and else statements to specify a block of code to be executed, when a specified condition is either true or false.
- Use of JavaScript syntax and built-in methods, thus enabling to make changes to the DOM elements.
- Able to practice with JavaScript data types such as; string, numbers and Boolean values.
